Three notebooks in Colab

Filters by hand, the learning loop and a network that straightens a page

Workshop, path 2: Colab

Open a notebook

You need a Google account.

1. Open the repository (bottom right), then *Open in Colab*.
2. *File → Save a copy in Drive*.

Then run the cells one at a time with Shift+Enter.

Three notebooks, by difficulty

01 Filters: the page as numbers

No training: nine numbers change what you see.

02 The learning loop: twelve examples

Yesterday’s line finds its way through the points.

03 Straighten the scans

Train a network that tells the angle.
